LIKE NOBODY’S BUSINESS

If it’s from all over and back again or from anywhere to beyond that the Quantum will get you and your business from A to B and everywhere in between. Whichever the choice you make, whether it’s the standard Panel Van with the super long wheelbase, wide body and high roof or the brand new crew cab model, “accommodation” is the key word. With its load capacity, durability, reliability and economic design, the Quantum is here to take care of business.

We’ve introduced two new Panel Van Crew Cab models: the 2.5 SLWB Diesel model and the 2.7 SLWB Petrol model. Both sport 6 seats that are introduced to create synergy between seating and load space – multi-tasking at its best.
All models feature a low floor and large rear door opening, for easy loading of even the bulkiest cargo. The super LWB models offer dual sliding doors large enough to accommodate a forklift and a standard pallet. Thanks to its cab-forward design, the Quantum boasts a longer load area: 6.06m³ for the standard Panel Van and an impressive 9.83m³ for the super LWB model. The Quantum has a minimum towing capacity of 1000 kg and a maximum of 1400 kg and to drive it, only a Code B driver’s licence is required.

We’ve given the Quantum a few new perks to handle your jobs. A brand new audio system*, redesigned heat panel and outside temperature display are here to complement any task at hand. A redesigned front bumper, headlamps, rear combination lamps, radiator grille as well as added daytime running lights will keep your Quantum on point for the foreseeable journey ahead.

The Quantum is built around its passengers and safety is essential. With features such as an ingenious double-wishbone front impact absorbing structure, front door impact beams and breakaway dash, as well as a retractable steering column and brake pedal. Both Panel Vans feature driver airbags and ABS with emergency brake assist.

*Available on the Quantum Bus only

FROM A TO B
AND EVERYWHERE
IN BETWEEN

The Super LWB panel van’s rear doors and side sliding doors are large enough for a forklift with a standard-size pallet to fit through with ease. The new crew cab has a rear door and side sliding doors for passengers to enter with ease.
DRIVE WITH EASE
With power-assisted steering, a high-mounted gear lever and an abundance of storage spaces, the Quantum Panel Van is a pleasure to drive.

FOLD-DOWN CENTRE SEAT
The centre seat in the Quantum Panel Van folds down to provide the driver with a “table” for a clipboard and space for two large cup holders.

PASSENGER CARE
Every passenger has a height adjustable head restraint and each seat is fitted with a three-point safety belt. Seat backrests also recline.

QUANTUM CREW CAB
Height adjustable steering wheel, power steering and electrically adjustable front windows all combine to enhance passenger and driver comfort and convenience.

CLEVER CONSOLE
The compact yet spacious centre console comes with ingenious storage solutions for both driver and front passengers.

STORAGE SOLUTIONS
The Quantum Bus boasts loads of clever storage spaces, including pockets and integrated cup holders on all seatbacks.

MAXIMISED INDIVIDUAL COMFORT
With every seat designed to fit an individual, comfort is guaranteed, and safety maximised, as every seat has its own seatbelt.

INTEGRATED COMFORT
The convenience of easy-to-reach cup holders, ensure a hassle-free drive.

SECURE YOUR INVESTMENTS
Eyelets around the load bay accommodate straps to secure cargo.

QUANTUM BUS
A front-loading CD player, bluetooth and aux input are available on all bus models. Height adjustable steering wheel, power steering and electrically adjustable front windows all combine to enhance passenger and driver comfort and convenience.

FIELD-DOWN CENTRE SEAT
The centre seat in the Quantum Panel Van folds down to provide the driver with a “table” for a clipboard and space for two large cup holders.

THE QUANTUM BUS

Both the 10-seater and 14-seater models offer superb flexibility and space, with the 14-seater you are able to seat up to 14 passengers as well as fit up the extra seats to fit an impressive amount of luggage. The Quantum Bus is designed around the comfort and safety of passengers, from the vinyl floors and privacy glass to the large sliding doors, high roof and central aisle that make for easy access to all seats. In spite of its ample proportions, the Quantum Bus only requires a Code B Driver’s License.

THE QUANTUM CREW CAB

The Quantum Crew Cab was designed to get you and your crew on the go and on the job. There is ample space for your crew and all the cargo and gear you need to get the job done, with comfortable seating and a sturdy and secure load bay. The Quantum Crew Cab is ideal for businesses that need to transport employees and equipment comfortably and safely to off-site locations, ideal for your cleaning service, gardening service, catering company, awards or promotions business, that means business.
IN THE DRIVER’S SEAT YOU’LL FIND THAT THE QUANTUM REALLY TAKES A STEP FORWARD IN MORE WAYS THAN JUST ITS DESIGN.

ACROSS THE RANGE, OUR POWERFUL, ECONOMICAL ENGINES MAKE FOR COST-EFFECTIVE TRANSPORTATION AND OUR SAFETY FEATURES OFFER ASSURED PEACE OF MIND.

DOWN TO THE BRASS TACKS

TRANSMISSION AND SUSPENSION

The business end of the Quantum’s design shows in its transmission and suspension. Its manual transmission is tuned to provide optimum shifting ease and is built to be durable. Its suspension consists of a double-wishbone front/torsion bar rear spring suspension and rear leaf spring suspension designed to optimise straight-line stability, ride comfort and overall load-carrying capacity because it creates more space in the rear of the vehicle.

Toyotas’s VVT-i (Variable Valve Timing-intelligent) engine technology combines efficient driveability with low fuel consumption and reduced emissions. Add to that a standard 5-year/90 000 km ToyotaCare Service Plan as well as 10 000 km service intervals and you’ve got the peace of mind that low operating costs bring.

Common rail technology allows for the precise measurement and injection timing of fuel. The result? More power, better fuel consumption, less noise and less pollution. Operating costs are further reduced thanks to the standard 5-year/90 000 km ToyotaCare Service Plan and 10 000 km service intervals.

SAFETY FIRST

The double-wishbone front frame design allows the driver and front passenger to be seated further up front while still having more space in the rear without jeopardising safety. In the event of a collision, front seat passengers are also protected by a breakaway dash and side impact protection bowers.

The 2.7-litre 4-cylinder petrol engine or 2.5-litre 4-cylinder diesel engine.
GOING GREENER

Toyota’s vision of Sustainable Mobility is ingrained company-wide Environmental Management System (EMS) ensures this. EMS guarantees constant performance at all levels. The introduction of a Toyota Earth Charter at www.toyota.co.za to find out how you may read more about these projects and the quest for low emissions, Toyota’s new GOING GREENER
